Email: sakshi.gupta7269@gmail.com

Summary of Qualifications (Knowledge & Skill Areas)

- 6.7 years of experience in .Net throughout the entire Software Development Life Cycle which includes **Analysis, Design, Estimation, Development, Testing and Deployment** of Client/Server, Web based Internet/Intranet applications and desktop applications.
- Administered development and UAT environments.
- Vast experience on Banking and Healthcare domain.
- Hands on Knowledge in developing Desktop application using .NET Framework 3.5 and 4.0.
- Well versed with Delivery Models Agile, Waterfall.
- Insightful knowledge in Web Applications using C#, .NET Framework, VS Unit Testing Framework, WCF, Web Services, Web API, LINQ, ADO.NET.
- Experience working with globally distributed teams.
- Successful in meeting new technical challenges and finding solutions to meet the needs of the customer.

Tools & Technology Expertise

Coding Languages	C#, Visual Basic.Net
Operating Systems	Windows
Web Technologies	Asp.Net, Html, Html5, CSS, JavaScript, CSS, WCF, Web API, XML, Entity Framework
Web Services	Rest, WCF
Databases	SQL Server 2008
Testing	Unit Testing with Nunit tool, Postman\Fiddler tools for Web
IDEs	Visual Studio
Version Control	Visual Source Safe, Team Foundation Server
Web Servers	Internet Information Services

Project Experience

Project name: Amalga Upgrade	
Role	Senior Development Engineer
Project abstract	The Caradigm® Intelligence Platform helps healthcare organizations transform care through the strategic use of data stored across the healthcare community. The cloud-based Intelligence Platform aggregates and normalizes clinical, operational and financial data from disparate systems—EHRs, billing systems, payers, pharmacy systems, labs, and HIEs—and delivers it to healthcare professionals in real time within their workflows, powering rich analytics capabilities. Healthcare organizations can use this data to gain deep insight into individual patients, populations, performance and processes, and to rapidly identify the actions needed to improve.
Client	Caradigm
Tools	C#, XML, SQL Server 2008, Windows services, Web API, Nunit, SSIS packages
Responsibilities	<ul style="list-style-type: none"> • SME on the CIP (Caradigm Intelligence platform) • Design Algorithms and show at UI level (CMD and care manager Application) • Responsible for executing the test cases and providing the load/performance results of the application using C#. • Configuring and implementing data on CIP for different US/UK clients. • Delegate tasks and track the same. • Tracking issues concerned with Development. • Interaction with client on daily basis. • Support during User Acceptance Testing and looking into raised issues. • Developed package Scripts and execute through SSIS. • Worked on Clinical view through CMD (Cohort Management Designer) for Multi Patient Views (MPV) and Single Patient Views (SPV).

Project name: IntellectFlow	
Role	Senior software engineer
Project Summary	IntellectFlow is an imaging and workflow application. The term imaging is used here as this application captures the images of scanned document used in Citibank. These documents have to process through various departments. Hence workflow comes into picture. This means document have to process through different route depending upon the conditions applied. It also facilitates storage and retrieval of images and document using third party tool Eastman 9.2.1. Currently this is implemented for 15 countries.
Client	Citibank
Tools	C#, SQL server 2008, SFTP, Eastman 9.2.1
Responsibilities	<ul style="list-style-type: none"> • Requirement analysis

	<ul style="list-style-type: none"> • Development of modules using C# .Net, SQL Server 2008. • Unit testing, System Integration Testing and User Acceptance Testing. • Responsible for writing the UI automation scripts, executing the test cases and providing the load/performance results of the application using C#. • Code review and all related artifacts review. • Incorporates code with Client Review comments. • Internal and External Defect fixing. • Build and Release in production.
--	---

Project name: Verifix	
Role	Associate Consultant
Project Summary	Verifix was a small project which is a kind of service used for specific value-rate transactions.
Client	Citibank
Tools	ASP.net,C#, SQL server 2008, SFTP, Eastman 9.2.1
Responsibilities	<ul style="list-style-type: none"> • Enhancement, Maintenance and support • Technical Analysis for requirements. • Responsible for writing the UI automation scripts, executing the test cases and providing the load/performance results of the application using C#. • Developed WCF services to enable effective communication between SOA. • Designed and developed business logic layer for connecting clients. • Pre-release, Unit testing, system integration testing, user acceptance testing. • Implementation into production.

Professional Experience

Harman Connected Services	May 2013 to till date	Senior Development Engineer
Polaris Software	May 2010 – Dec 2012	Associate Consultant

Education

- **Post Graduate Diploma in Advanced Computing** from Sunbeam (C-DAC), Pune in Aug 2008 with B grade.
- **B.E. (Computer Science)** from RFDFIST Bhopal, Madhya Pradesh in 2004 with 73.68%
